Installation Instructions

Get Started

To install the InstantMember script, please follow the following steps:

1. First download the InstantMember script file which can be found inside under the "**Member Menus**" -> "**My Downloads**" menu inside the InstantMember.com member area. Login here:
http://www.instantmember.com/member/user_login.php

Your Downloads

In this section you'll find all the downloadable files associated with your account:

Latest!...

Instant Member Current Version Is v1.4
[Release Date: May 10th 2009]

Instant Member Install Script V1.4

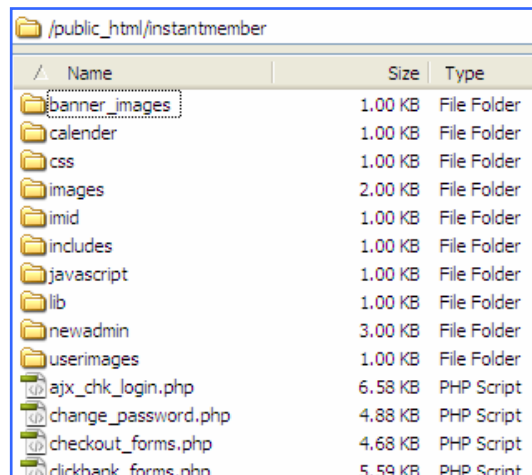

Instant Member Install Script V1.4

This is the most up to date version of Instant Member Installation Script

Note: If you are updating an existing site please upgrade via the patch system.

[CLICK HERE TO DOWNLOAD](#)

2. Once you have downloaded the ZIP file, extract it. (If you need a free unzip tool, [click here to download ALZip](#))
3. Next open your FTP program and connect to your domain / hosting account with your FTP details.
4. Then create a folder in **public_html** and upload the InstantMember script to this new folder.

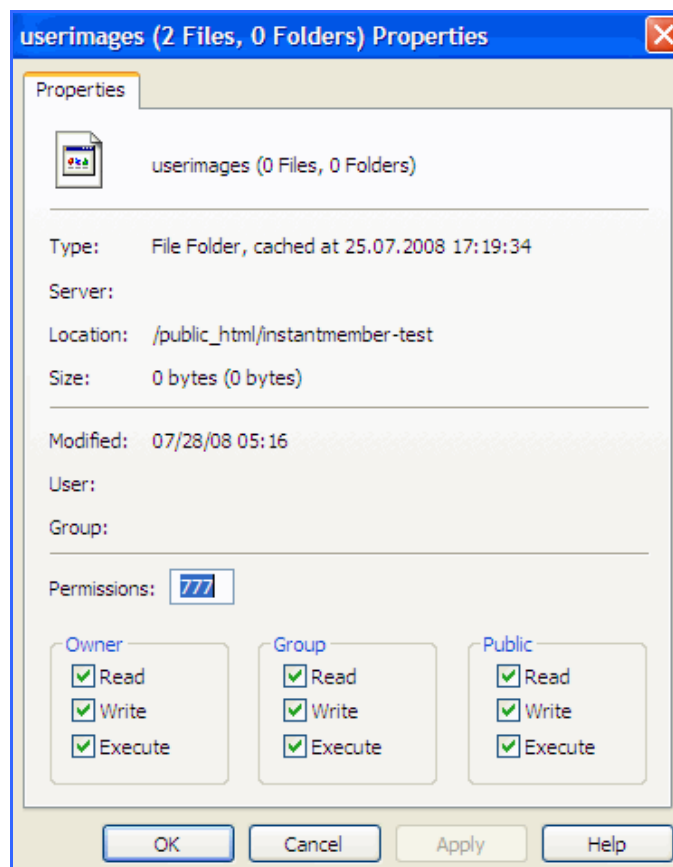

Name	Size	Type
banner_images	1.00 KB	File Folder
calender	1.00 KB	File Folder
css	1.00 KB	File Folder
images	2.00 KB	File Folder
imid	1.00 KB	File Folder
includes	1.00 KB	File Folder
javascript	1.00 KB	File Folder
lib	1.00 KB	File Folder
newadmin	3.00 KB	File Folder
userimages	1.00 KB	File Folder
ajax_chk_login.php	6.58 KB	PHP Script
change_password.php	4.88 KB	PHP Script
checkout_forms.php	4.68 KB	PHP Script
clickbank_forms.php	5.59 KB	PHP Script

Change Permissions

Once all files are uploaded, change the permission of the following files and folders to '777'.

1. Please make sure "foldername/**includes/config.php**" file needs to be **CHMOD "777"**.
2. Please make sure "foldername/**imid**" folder needs to be **CHMOD "777"**.
3. Please make sure "foldername/**imid/.htaccess**" folder needs to be **CHMOD "777"**.
4. Please make sure "foldername/**userimages**" folder needs to be **CHMOD "777"**.
5. Please make sure "foldername/**banner_images**" folder needs to be **CHMOD "777"**.
6. Please make sure "foldername/**lib/db_backup_restore/backups**" folder needs to be **CHMOD "777"**.

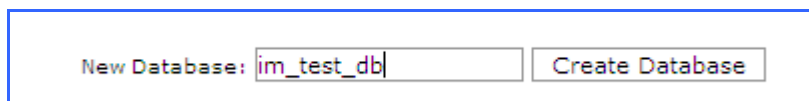

Create a Database and User

Create a new database and user in MySQL database:

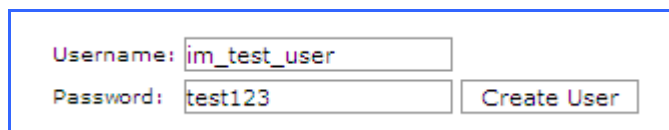

1. Open your **cPanel** (Control Panel) of your web host to access MySQL database.
2. Locate the **"MySQL® Databases"** icon. (See figure below).

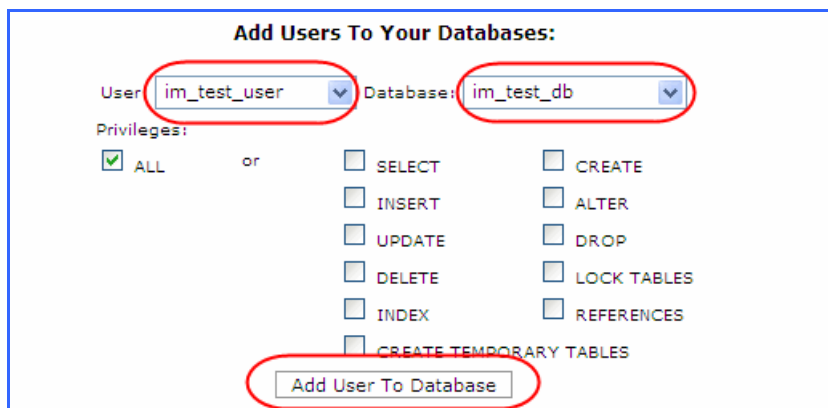

3. Enter a new database name to the **"Database Name:"** field and click on the **"Create Database"** button.

A screenshot of a web form for creating a new MySQL database. It features a text input field labeled "New Database:" containing the text "im_test_db", and a button labeled "Create Database" to its right.

4. Create a new user by providing username and password to the **"Username"** and **"Password"** fields respectively, and clicking on the **"Create User"** button..

A screenshot of a web form for creating a new MySQL user. It features two text input fields: "Username:" containing "im_test_user" and "Password:" containing "test123", and a button labeled "Create User" to the right of the password field.

5. Link the database with the user by selecting the proper **"User"** and **"Database"** values (that you've just created) from the dropdown menus, and clicking on the **"Add User to Database"** button.

A screenshot of the "Add Users To Your Databases:" form in cPanel. The "User" dropdown menu is set to "im_test_user" and the "Database" dropdown menu is set to "im_test_db", both highlighted with red circles. Below these are checkboxes for various privileges: "ALL" (checked), "SELECT", "INSERT", "UPDATE", "DELETE", "INDEX", "CREATE TEMPORARY TABLES", "CREATE", "ALTER", "DROP", "LOCK TABLES", and "REFERENCES". The "Add User To Database" button at the bottom is also highlighted with a red circle.

Start Installation

Now you are ready to run the InstantMember Installation script:

1. First, open following link in your browser:

<http://yourwebsite.com/foldername/>

Where **yourwebsite.com** is your actual domain name,

And where **foldername** is the name of folder you created in the step above (the folder where you uploaded the InstantMember script).

2. After entering that link you will see following screen in your browser.

Installation Script

Through this site you can make set up your website. This requires you to only have php and mysql support for your site. This installer will install all the necessary things on your server. You have to just supply some common information and relax on your seat. The script will be installed in just 2 mins.

To begin the installation, please click on the button below:

Important Steps needed to complete installation:

- 1) Please make sure "*urfolder*/includes/config.php" file needs chmod "777".
- 2) Please make sure "*urfolder*/imid" folder needs chmod "777".
- 3) Please make sure "*urfolder*/imid/.htaccess" folder needs chmod "777".
- 4) Please make sure "*urfolder*/userimages" folder needs chmod "777".
- 5) Please make sure "*urfolder*/banner_images" folder needs chmod "777".
- 6) Please make sure "*urfolder*/lib/db_backup_restore/backups" folder needs chmod "777".

Please complete above process and then click on the button below:

Continue 

3. After verifying all the CHMOD settings, click on the "**Continue**" button and you will see this next screen.

Script Installation

Domain Information:

[Name of your domain.]

Domain Name

e.g. yourdomain.com

[Key assigned to your domain.]

Domain Key

Database Information:

[Host Name of the Database.]

DB Host Name

e.g. localhost

[DataBase Name where you want to store data.]

DB Name

[DataBase **User Name & Password.**

The username and password are used to connect to the database server.]

DB User Name

DB Password

[The site path is used to configure several things.

Please enter it as eg. http://www.xyz.com/folder_name/]

Site Name

Site URL

[Admin email address is used for sending and receiving various types of mails.]

Admin Name

Admin Email Address

[Paypal account information.]

Paypal email address

Submit 

4. Provide all the inputs as specified below:

- **Domain Name** – Your valid domain name, where your InstantMember script will be installed. *e.g. yourwebsite.com*
- **Domain Key** – Generate a "Domain Key" from the InstantMember.com member area under the "**Member Menus**" -> "**Domain Registration Details**" menu. Login here:
http://www.instantmember.com/member/user_login.php

↓ Domain Details [Manage](#) | [+ Add New Domain](#)

[Note :Even though you Inactivate any domain, it will be accessible to End user till 20min from your inactivation of that domain.]

SR.N.	DOMAIN	SERIAL KEY	DATE	STATUS	EDIT	DELETE
1	yourwebsite.com	THIS-IS-A-DEMO-SERIAL	2008-07-25	Active		

- **DB Host** – Your database server. *e.g. localhost*
- **DB Name** – The database name you've created earlier.

NOTE: Your web host will automatically add a prefix to the database name that you've entered. Please use the same database name which is listed under "Current Databases".

- **DB User Name** – The user name you've created earlier.

NOTE: Your web host will automatically add a prefix to the user name that you've entered. Please use the same database name which is listed under "Current Users".

```
pre_im_test_db Delete Check Repair
Users in im_test_db
pre_im_test_user (Privileges: ALL PRIVILEGES) Delete

Connection Strings
Perl $dbh = DBI->connect("DBI:mysql:pre_im_test_db:localhost",
"pre_im_test_user","<PASSWORD HERE>");
$dbh=mysql_connect ("localhost", "pre_im_test_user",
"<PASSWORD HERE>") or die('Cannot connect to the database
because: ' . mysql_error());
PHP mysql_select_db ("pre_im_test_db");
```

- **DB Password** – Password for the above user name.

- **Site Name** – Your membership site's title.
- **Site URL** – This is the full URL to the folder where you uploaded the InstantMember script.
- **Admin Name** – Enter the name of the Admin. *e.g. John Doe*

NOTE: The "Admin Name" value is NOT the user name for the "Admin Panel". The default user name for the "Admin" access is "*admin*"(without quotes).

- **Admin Email Address** – Admin's valid email address.
 - **Your PayPal Email Address** – Your PayPal email address.
7. After you fill the above information out, click on "**Submit**" button and you will get the following screen confirming a successful installation.

▶ Script Installed Successfully

Script for 'Instant Manager' is successfully installed on your domain.

Your Admin Panel Login Details are :	
Username	admin
Password	admin123

[Admin Login ▶](#)

IMPORTANT: After you finish the installation process, **remove the "installer" folder from the site**, to avoid any security issues and prevent anyone tampering with your script.

8. Now click on "**Admin Login**" button. And login with following details:

Username: *admin*

Password: *admin123*

Login

Login:
admin

Password:
.....

[Note: Password is case sensitive]

Remember me?

[Forgot your password?](#)

Submit ▶

Instant Member 1.3.1

9. Refer to the "*InstantMember v1.31 User Guide*" to learn how to set your InstantMember membership site up easily.

Minimum Server Requirements

Operating System

Linux

Software

PHP: 4.4.4 onwards

MYSQL: 4.1.22 onwards

Hardware

CPU: Intel Xeon minimum

RAM: 1GB minimum
